POS7745-20F-01 0001

POS 7745: Advanced Quantitative Methods in Political Research

Fall 2020

School of Politics, Security and International Affairs, College of Science

Credit hours: 3

Instructor Information

- Name: Dr. Christopher Uggen
- Office Location: 420 Colbert Hall (Annex)
- Phone: 407 823 2991
- Email: Chris.Uggen@ucf.edu (recommended)
- Vita: Vita 2020
- Course Number & Section: POS 7745
- Course Location: Online Asynchronous
- Course Website: Canvas
- Office Hours: Tues 1:00-2:00 PM
- Class Meeting Time: 2pm - 4:50pm
- Class Meeting Place: Online
- Course Modality: Online (Asynchronous)

Enrollment Requirements

Course Prerequisites: Graduate standing. Passing the pre-test (see below) given to enrolled graduate students in the Spring semester prior to the course.

COVID-19 Related Policies

To protect members of our community, everyone is required to wear a facial covering inside all common spaces including most classrooms. See https://www.ucf.edu/coronavirus/faq/#faq-masks-and-face-coverings for details on who chooses not to wear facial coverings will be asked to leave the classroom by the instructor. If they refuse to leave the classroom, the instructor will dismiss the class and report the incident to the Dean of Students. Students who are not wearing a facial covering because they have the right to consult about their options and seek healing or reconciliation will be accepted. Students will be responsible for the material that would have been covered in class as provided by the instructor.

Depending on the course of the pandemic during the semester, the university may need to change how classes are offered. If such happens, please look for announcements on Canvas and messages in INBoxes/myUCF or Knights email. Such changes may include:

COVID-19 Lecture Recordings - Students who believe they may be disadvantaged by not being able to attend UCF Student Health Services (407 823-2509) or proper contact tracing procedures can take place.

Students should come to class if they are able to, in accordance with guidance from CDC/FDA. Do not travel anywhere and/or be COVID-19 or exhibiting flu-like or other infectious disease symptoms or in both with COVID-19 symptoms. Follow the guidelines of Seminole County Health Department. https://www.seminolecounty.gov/health/COVID-19-coronavirus/index.stmx

Students should contact their instructor(s) as soon as possible if they miss class for any illness reason to discuss alternative ways to receive the material they miss. Students should not contact their instructor(s) for medical information.

In Case of Faculty Illness - If the instructor falls ill during the semester, there may be changes to this course. Students will be informed of any changes to the course via their UCF email address and announcements in myUCF. Messages posted to Canvas are also an alternative to the email.

Course Accessibility and Disability COVID-19 Supplemental Statement - Accommodations may not be added or changed during the pandemic if doing so would compromise the course. Students with disabilities should contact Disability Services at 407-823-2811 to discuss accommodations in the current environment.

Course Description

This course is designed to introduce students to advanced topics in the use of statistical methods as well as other quantitative approaches in political research. Students will learn how to read, write, and think like a social scientist and learn how to use quantitative and qualitative research methods in order to perform quantitative data analysis (linear and logistic regression, time series data analysis, panel data analysis). The course will also introduce students to other quantitative approaches in political research such as survey research, qualitative research, and qualitative data analysis that are used in political science research such as content analysis, qualitative comparative analysis, agent based modeling, and social network analysis.

By the end of the course students will be familiar with the tools used to correct quantitative research in political science and know how to conduct and critique a high quality methodology in the analysis of political phenomena.

Course Materials

Required Materials/Resources

- Gujarati, Damodar N. 2004. Basic Econometrics. 4th Edition. McGraw Hill.
- SPSS 5.0 software.
- Additional readings will be required and students will need to search and download the relevant literature (see Course Schedule and Course Modules).

Optional Materials/Resources

Books:

- Hamilton, Lawrence C. 2013. Statistics with STATA: Version 12. 8th Edition. Brooks/Cole Cengage Learning.
- Kennedy, Peter. 2008. A Guide to Econometrics. 6th Edition. Wiley-Blackwell.
- Lin, Jeff. 2016. Quantitative Methods in Political and Social Research. Cambridge University Press.
- Pew, John. 1995. Regression Diagnostics: An Introduction. Sage Publications Inc.

Handbooks:

- A collection of chapters, at the country level, from 1990 to today (see Nick and Lauderdale's chapter). Oxford Handbook of Comparative Political Institutions. Oxford University Press. Available online.
- Johnson Whitaker. http://www.ucf.edu/myucf/myucf/. Database. Free.
- ICPSR Inter University Consortium for Political and Social Research. Free & Analysis Data. http://www.icpsr.umich.edu/icpsrweb/ICPSR/ Free.
- Stockholm International Peace Research Institute Yearbook. http://www.sipri.org/ Free.
- Summary of Data Available. http://www.ucf.edu/myucf/myucf/. Free.
- Uppsala Conflict Data Program. Uppsala University, Department of Peace and Conflict Research, Uppsala, Sweden. http://www.pcr.uu.se/research/UCDP/index.htm. Free.
- Wilson, Rick K. 1996. Formal Theory in Political Science. Washington University. Free.
- Comparative Study of Electoral Systems. Other Comparative Projects. http://www.cses.org/about.htm

STATA Resources:

- Free video tutorials on STATA are available here: http://www.stata.com/links/video-tutorials/
- Annotated bibliography of examples of data analysis in STATA: http://www.ucla.edu/stata/

Student Learning Outcomes

In this course, you will learn:

1) To understand how to conduct and interpret linear and logistic regression analysis.
2) To understand how to conduct and interpret time series data analysis.
3) To understand how to conduct and interpret panel data analysis.
4) Present your findings both orally (through presentation) and written (through writing a research report).

Course Activities

Discussion Assessment: Discussion (15 points)

Discussion boards will be the main vehicle where the weekly lecture, lab, or module method. Discussion takes the following form:

- Two students will discuss a topic (analysis method) assigned.
- One student is responsible for taking notes of the presentation and discussion and submitted the notes on the discussion board (myUCF).

Critical thinking

Critical thinking means that, amongst, there is no a power point or not. You are encouraged to search for critiques/criticism of the topic assigned for school. Is there a hypothesis testing, where not, what are the limitations? What are the strengths of the specific analysis method?

If you have doubts or do not know how to proceed you can organize a meeting with me and I will provide guidelines. Discussion is worth 15 points.

Technical Assessment: Labs/home assignments (25 points)

Each week of students will be expected to complete the assignment given. Assignments vary for example, labs have assignments or generally relate to anything dealt in STATA. The emphasis will be where the weekly topic.

Final Project

Project Presentation (10 points) – open to faculty and other students

- The project presentation can be done individually or in groups. Presentation cannot be longer than 15 minutes (10 minutes presentation, 5 minutes for questions). Presentation is worth 10 points.
- Grading: 2 points for general of the group members have to be mentioned
- Each individual will have to present part of the project in turn/order.
- Each individual will have to mention what he/she did, which will determine 5 points for this assignment.
- A group can be of no more than 3

Final Project Paper (30 points)

The final project is due the last week of class

- The final project can be discussed with me at any time during the course. If you have your own topic, we will discuss it. Or I can provide you with a topic related to your field of study or suggestions.
- The final paper is to discuss your survival or drift. It has to involve an in-depth analysis of a topic of your interest. Or a topic I have suggested. The topic has to have been approved by the instructor.
- The final paper is an individual project.

- Your final project requirement of a thoughtful analysis on a topic of your choice.
  - You can choose to analyze and critique an existing paper that uses statistics or other type of analysis and relate it to your research interests.
  - You can choose to analyze your own primary data.
- The final research project paper should contain a brief literature review on the topic you are working on.
- Depending on the topic, the paper should include a research question, a hypothesis, data, methodology, discussion and conclusion.
- The word count of your final paper should be 3,000 words (excluding bibliography).
- Students are encouraged to meet with the instructor at any time during the course to discuss their topic.

The course must be at least 2000 words, not to exceed 3500 words.

Assignment Breakdown for final grade

Continuous Learning	Discussion	15 points
	Technical Assessment	25 points
Final Evaluation	Project Presentation	10 points
	Final Project Paper	30 points
Exam	Statistic Exam	10
	Final Exam	10

Activity Submissions

Assignments will be submitted on InBoxes/myUCF.

Make-up Exams and Assignments

The university policy, you are allowed to submit make-up work for an acceptable, alternate assignment for unavoidable circumstances (such as illness, death in family, and other similar circumstances). Students are not guaranteed a make-up for unexcused absences. Students are responsible for contacting the instructor within 24 hours of the absence to request an alternate assignment. Students are responsible for providing documentation to support their absence. The make-up assignment and grading scale will be equivalent to the missed assignment or exam. Students who miss a class session are responsible for the material covered in class and any assignments or announcements given in class. Students who miss a class session prior to the class in which the deadline is reached are responsible for turning in the assignment on the date of the class in which the assignment is due. Students who miss a class session are responsible for contacting the instructor to discuss the assignment.

Grading

Letter Grade	Points
A	93-100
A-	90-92
B+	87-89
B	83-86
B-	80-82
C+	77-79
C	73-76
C-	70-72
D+	67-69
D	63-66
D-	60-62
F	0 to below 60

Consult the latest strategy advice at Graduate catalog for regulations and procedures regarding grade such as Incompletes grades, grade changes and grade Forgiveness.

Course Schedule

Week	Topic	Reading	Assignments and Due Date
Week 1 Aug 24	Introduction: Science and Research Design	• Hanneman, J., & Hoxhaj, R. (2002). Foundations of 'new' social science research: Ontology, epistemology, methodology, and ethics. Paper presented at the Annual Meeting of the Australian Sociological Association (TASA 2005). • Gujarati, D. (2003). Ch4. Functional form of regression models. Basic econometrics, 4th edition. Boston: McGraw Hill.	
Week 2 Aug 31	An overview of quantitative research: A digest/ suggestions on how to choose the appropriate data	• Lecture will be based on Biggar, J.G. (August 8). Modeling and Simulation in Tourism and Hospitality: Chapter 1 and Chapter 4	
Week 3 Sept 07	• Review of the Linear Model and Ideas on research design	• Kelsey, Stephen and Heather Long. 2004. Research Design and Analysis: Lecture Notes. Criminal Justice Research Consortium. Conflict Resolution 4B-02-135. Free. • Gujarati, chapters 1 - 3	• Discussing Research Design and the linear model (1 points) • Discussion will be held in class
Week 4 Sept 14	• Guest Lecture on Contact Analysis (Dr. Prof. Peter Jaquez)	• Grimmer, J., & Stewart, B. M. (2013). Text as data: The promise and pitfalls of automatic content analysis methods for political texts. Political analysis, 1-23). 247-267. • Lewis, M. S., Garcia, J. (2008). Estimating the effects of voter registration laws. Electoral Studies, 27(1), 197-224.	• Discussing QCA and Content Analysis (1 points) • Discussion will be held in class
Week 5 Sept 21	• Qualitative Comparative Analysis	• Ragin, C.C. 2006. Set relations in social research: Evaluating their consistency and coverage. Sociological Methods & Research, 35(4), 592-632. • Ragin, C., Berwick, A., Fiss, P., Rihoux, Rubinson, C., Rutgers, S., & Rutgers, M. (2008). Qualitative comparative analysis using fuzzy sets (fsQCA). In Configurations, hybrids, and fuzzy sets in social inquiry: Proceedings of the 18th annual meeting of the Society for Comparative Research, Irvine, CA, pp. 67-72. (QCA applied and introduction of reliability issues) – read this paper before class	• Discussing QCA and Content Analysis (1 points) • Discussion will be held in class
Week 6 Sept 28	• University, Institutions, and Hypothesis Testing	• Gujarati, chapters 5 • Cure King and Dawne Todd Mitchell. 2004. Hypothesis Testing. Lecture Notes. Free. http://www.cas.sc.edu/soci/faculty/cure/courses/soci-552.html • Dawne Todd, McElreath B. 2004. The natural selection of bad science. Royal Society Open Science 3:160384	• Take home assignment 1 (points) • Discussion will be held in class
Week 7 Oct 05	• Multivariate Regression	• Gujarati, chapter 7 & 8 • Kennedy, Ch. 3 & 4 • Kelsey, Stephen. 2004. Multivariate Regression Equations. Criminal Justice Research Consortium. Conflict Resolution 4B-02-135. Free. • Kennedy, Ch. 5 & 6 • Kelsey, Stephen. 2004. Multivariate Regression Equations. Criminal Justice Research Consortium. Conflict Resolution 4B-02-135. Free. • Brambor et al. 2005. Understanding Interaction Models: Improving Empirical Analyses. Political Analysis 13: 1-20	• Take home assignment 2 (points) • Discussion of **Before class** (points) • Discussing Multivariate Regression (3 points) • Discussion will be held in class
Week 8 Oct 12	• Dummy Variables and Interaction Terms • Multicollinearity • Joint Qualitative Hypothesis	• Gujarati, chapter 9 • Gujarati, chapter 10 • Aiken L, Fredrick. 1996. A Mediational Analysis of Multicollinearity in Regression Equations. American Journal of Political Science. (424): 797-832 • Gujarati, Damodar N. Econometrics. 2007. Testing for Exact Linear Restrictions. The Electrical Compensation of Globalization. Gujarati Pelkiar Blackie. 4th Ed. 2004. 2007. • Brambor et al. 2005. Understanding Interaction Models: Improving Empirical Analyses. Political Analysis 13: 1-20	• Take home assignment 3 (points) • Exit Ticket (**5 before class**)
Week 9 Oct 19	• Heteroskedasticity, Autocorrelation, Specification Bias, Model specification and Diagnostics	• Gujarati, chapters 10, 11, 12, 13 • Chatterjee, Sangit and Hadi Ali S. Hawkins (1981). Use of Regression Diagnostics in Investigating Collinearity. Journal of Political Science 27: 497-513	• Take home assignment 4 (points) • Exit Ticket (**5 before class**) • Discussing Regression Diagnostics (3 points) • Discussion will be held in class
Week 10 Oct 26	• Time Series Analysis and Longitudinal models	• Gujarati, chapter 16 and 21	• Take home assignment 5 (points) • Exit Ticket (**5 before class**)
Week 11 Nov 02	Guest Week (no meeting. Organize a panel with Ivy Leagues)		
Week 12 Nov 09	• Networks	• Wasserman, Stanley. 1994. Social Network Analysis. Cambridge University Press. Pp. 1-27. • Wasserman, Stanley. 1994. Social Network Analysis. Cambridge University Press. Pp. 37-44. • Kelsey, Stephen. 2004. Social Network Analysis. Criminal Justice Research Consortium. Conflict Resolution 4B-02-135. Free. • Berkman, L. 2000. Social Networks, Host Resistance, and Mortality: A Nine-Year Follow-Up Study of Alameda County Residents. Am J Epidemiol 152(9): 877-883. • Borgatti, S. 2003. The Key Player Problem. Dynamic Social Network Modeling and Analysis: Workshop Summary and Papers. Ed. Ronald Breiger, Kathleen Carley, and Philippa Pattison. Committee on Human Factors, Board on Behavioral, Cognitive, and Sensory Sciences, Division of Behavioral and Social Sciences and Education. Washington, DC: The National Academies Press. 241-252. • Borgatti, S. 2003. The Key Player Problem. Dynamic Social Network Modeling and Analysis: Workshop Summary and Papers. Ed. Ronald Breiger, Kathleen Carley, and Philippa Pattison. Committee on Human Factors, Board on Behavioral, Cognitive, and Sensory Sciences, Division of Behavioral and Social Sciences and Education. Washington, DC: The National Academies Press. 241-252.	• Discussing Network Analysis (3 points) • Discussion will be held in class
Week 13 Nov 16	• Thanksgiving	No Class	
Week 14 Nov 23	• CLASS PRESENTATIONS		
Week 15 Nov 30	Research project due and Final Exam (Dec. 10th 2:00pm-5:50pm)		

University Services and Resources

Academic Services and Resources

A list of available academic support and learning services is available at UCF Student Services. Click on "Academic Support and Learning Services" on the left side of the page.

Non-Academic Services and Resources

A list of non-academic support and services is also available at UCF Student Services. Click on "Support" on the right hand side of the page.

For more information on the syllabus, please consult the UCF Online Student Guidelines for more information about your access to and use of this portal.

Policy Statements

Academic Integrity

Students are expected to be in compliance with UCF's Rules of Conduct. According to Section 3, "Academic Misconduct," students are prohibited from:

- Unauthorized assistance: Using or attempting to use unauthorized materials, information or study aids in any academic exercise. Unless specifically authorized by the instructor, this includes but is not limited to, the use of notes during an examination and unauthorized assistance from any source.
- Communication to another through written, visual, electronic, or oral means. The presentation of material which has been prepared by another person or purchased or otherwise obtained from an commercial or non-commercial enterprise with the intent of being presented as one's own work.
- Violation of Course or Laboratory Rules: Failing of course material to comfort genuine, student, while satisfying the requirements of a course or laboratory, in accordance with the ethical standards generally recognized in the university and the academic community. Course materials include but are not limited to, class notes, transcripts, PowerPoints, course syllabi, tests, quizzes, labs, instruction sheets, homework, study guides, handouts, etc.
- Falsification: Misrepresenting facts with the intent to deceive or defraud.
- Plagiarism: Using or appropriating another's work without any indication of the original source. Plagiarism is a course the impression that one's work is the student's own work.
- Complicity: Participating in an act of dishonesty or assisting others with their dishonesty.

Students who violate the University's Rules of Conduct will be subject to disciplinary action.

For more information about Academic Integrity, students may consult The Center for Academic Integrity.

Responsibility for Maintaining Confidentiality of Student Records: Consult the Family Educational Rights and Privacy Statement in Black Rock.

Responsibility for Maintaining Confidentiality of Student Records: Consult the Family Educational Rights and Privacy Statement in Black Rock.

Students should also familiarize themselves with the procedures for academic misconduct in UCF's student handbook, Golden Rules. Section 3 of the Rules of Conduct governs academic misconduct. According to Section 3 of UCF's regulations, students are granted a period of time after being notified of an charge of academic misconduct. Students can include a failing grade in an assignment or in the course, suspension or expulsion from the university. Students who are suspected of violating the University's Rules of Conduct will be notified of the charge, given the chance to present their side of the story, and have the opportunity to appeal the decision.

Students should also familiarize themselves with the procedures for academic misconduct in UCF's student handbook, Golden Rules.

The University of Central Florida is committed to providing a safe and secure environment for all persons with disabilities. Students who need assistance in the event of an emergency should contact their instructor as soon as possible. Students should also contact Student Accessibility Services (SAS) at the Ferrell Commons, Building 11, Suite 185, phone (407) 823-2811. Through Student Accessibility Services, a Course Accessibility Letter may be created and sent to your instructor. Students who have a Course Accessibility Letter should meet with their instructor to accomplishing reasonable course and accommodations and/or modifications in the course during alternate sites for individual academic and course learning experiences in the classroom.

Campus Safety Statement

Emergencies on campus are very rare, but if one should arise in our class, everyone needs to work together. Students should familiarize themselves with the following guidelines and be prepared to assist others:

- In case of an emergency dial 911 for assistance.
- Every UCF classroom contains an emergency procedure guide posted on a wall near the door. Please review it and be familiar with the procedures in case of an emergency.
- http://emergency.ucf.edu/ (Emergency Management Website)
- Students should know the evacuation routes from each of their classrooms and have a plan for leading others in an emergency evacuation.
- If there is a medical emergency during class, you may need to assist a fellow student until help arrives. Review the Conflict Reduction Team where these skills are taught.
- Sexual Harassment and Sexual Violence Prevention and Response Information.
- To report information about sexual misconduct, sign up for a course, UCF Sexual Misconduct Training, and tagging a Child on "Student Self Service" located on the left side of the screen on the myUCF portal, contact the Dean of Students Office, or contact the Office of Equity and Diversity (407) 823-2509 or 823-2510.
- Sexual Misconduct and Relationship Violence Resources: Victim Services, Victim Advocacy, Counseling, Medical, Legal, Academic, Housing, Financial, Employment, Transportation, Protection Orders.
- Students with special needs related to emergency situations should speak with their instructors outside of class. Students who have Accessibility Services Letters for common situations on campus, should review the letter with their instructor at the beginning of the class.

Deployed Active Duty Military Students

If you are a deployed active duty military student and feel that you may need a special accommodation due to that unique status, please contact your instructor to discuss your circumstances.

Copyright

This course may contain copyright protected materials such as audio or video clips, images, text materials, etc. Copyright laws and other applicable laws govern your use of these materials. Unauthorized distribution of copyrighted materials may be subject to civil and criminal liability. For more information, please see the University of Central Florida Policy on Copyrighted Materials. Unless otherwise noted, all UCF copyright materials are credited to the copyright holder.

Third-Party Software and FERPA

During the course you might have the opportunity to use audio, video or access and/or software applications, presentations and other platforms and or tools, among others, while some of these applications may be hosted by third parties, your participation is voluntary. Your participation may result in the disclosure of your education information about yourself or your classmates. Where appropriate you may use a pseudonym or nickname. Some of these applications may require you to create a profile with a third-party vendor using your UCF email address. Some requests your date of birth. Some also require you to provide directory information to share your name, screen name, photo, contact your classmates.

Third Party Accessibility and Privacy Statements

If you are using a third-party tool, link to the tool's accessibility and privacy statement here. Most tools will include these statements on their home page.

Course Summary:

Date	Details
Thu Sep 03, 2020	(Discussion) Research design and one-tailed t-test
Thu Sep 10, 2020	(Discussion) Correlation, Bivariate and QCA
Thu Sep 17, 2020	(Discussion) Multivariate, Heteroskedasticity and Autocorrelation
Thu Sep 24, 2020	(Take Home Assignment 1)
	(Discussion) Multivariate Regression Models
Thu Oct 01, 2020	(Take Home Assignment 2)
	(Discussion) Multivariate Diagnostics
Thu Oct 08, 2020	(Take Home Assignment 3)
Thu Oct 15, 2020	(Take Home Assignment 4)
	(Discussion) Networks
Thu Oct 22, 2020	(Take Home Assignment 5)
	(Discussion) Regression Diagnostics
Thu Nov 05, 2020	(Discussion) Time Series
Thu Nov 12, 2020	(Take Home Assignment 6)
	(Discussion) Networks
Thu Nov 19, 2020	(Discussion) Agent Based Modeling
Thu Nov 26, 2020	(Discussion) Presentations
Thu Dec 03, 2020	(Discussion) Presentations
Thu Dec 10, 2020	Final Exam
Thursday, December 10, 2020	Final Exam
