Course Description

Constitutional law addresses the contents of the U.S. Constitution and the interpretation of those contents. We will look at the organization of the United States Government (i.e., the distribution and execution of those powers); and the relations between the Government and persons under its jurisdiction (i.e., under the Bill of Rights). Under the United States' system, the chief problems of constitutional law center on the basic matter of judicial review, on relations between and among the three (3) branches of government, on the federal system's distribution of powers between the federal and state governments, and on the restrictions or limitation on government in either procedural or substantive (e.g., due process) contexts. University Course Catalog Description: Development of American federalism and national power, commerce clause, and nationalization of the economy.

Course Prerequisites

ENC 1102 (Freshman Composition II), POS 2041 (American National Government) or consent of the instructor. I encourage you to take POS 4284 (Judicial Process and Politics) prior to taking this class.
