The UCF Trauma Management Therapy Program is continuing to recruit participants in both our 17-week program and 3-week intensive program. **We currently have openings for our next 3-week Intensive Program, which will be held from March 4 through March 22.** Individuals who have PTSD and complete a comprehensive assessment may be eligible to participate in this program. The intensive program offers housing at Homewood Suites and a daily breakfast free of charge. This treatment is ideal for those who are currently active duty or live outside of the Orlando area.

All participants are treated with exposure therapy, currently the most scientifically supported treatment for PTSD. Virtual Iraq/Afghanistan is a software program used to augment exposure therapy by adding sights, sounds, and smells associated with the traumatic event. This clinical research program is funded by the Dept. of Defense and is offered to participants at no cost. For more information on these programs, please contact Dr. Sandra Neer at **407-823-1668.**

If you are 18 years or older, own a smartphone, and are experiencing depressed mood, you may be eligible to participate in a clinical research study examining a group treatment for depression. Therapy is available, free of charge, to qualified men and women with depression AND a smartphone, at the University of Central Florida Psychology Clinic. This study does not involve medication. Clinicians will assist those who do not qualify for the program to find other treatment.

For more detailed information please contact: Rebecca Weaver at the UCF Psychology Clinic (407) 823-4348

Dr. Deborah Beidel, Ph.D., ABPP
Dr. Beidel joined the faculty at UCF in 2007 as professor and director of the doctoral program in clinical psychology. Dr. Beidel received her Ph.D. in 1986 from the University of Pittsburgh and completed her internship and post-doctoral clinical research fellowship at Western Psychiatric Institute and Clinic, University of Pittsburgh. She was the 1990 recipient of the Association for Advancement of Behavior Therapy’s New Researcher Award, the 1995 recipient of the Distinguished Educator Award from the Association of Medical School Psychologists, and the 2007 recipient of the APA Division 12 Samuel M. Turner Clinical Research Award. Dr. Beidel holds the American Board of Professional Psychology (ABPP) Diplomate in Clinical Psychology and Behavioral Psychology and is a Fellow of the American Psychological Association and a past-president of the Society for a Science of Clinical Psychology. Dr. Beidel is the Editor and Chief of the Journal of Anxiety Disorders, a member of the Board of Directors, CUDCP and a member of NIMH Institutional Review Group, Children and Families Intervention Group. She serves on the editorial board of a number of scientific journals. Her academic, research, and clinical interests focus on child and adult anxiety disorders, including their etiology, psychopathology and behavioral treatment.
