

MfA FELLOWSHIP

Join an accomplished group of math enthusiasts dedicated to making a change.

The MfA Fellowship, a five-year program in New York City, offers stipends of \$100,000—in addition to a full-time teacher's salary—to encourage recent college graduates and mid-career professionals to enter into a career teaching mathematics.

For information about MfA Fellowships in other program locations, please visit www.mathforamerica.org/program-locations.

You love that “aha” moment;
you’re a teacher at heart.

1 The MfA Fellowship provides full-tuition scholarships to earn a master's degree in an exclusive program at The City College of New York followed by a four-year commitment to teach mathematics in a New York City public secondary school.

2 The MfA Fellowship offers a supportive environment to become expert in the teaching profession by providing new teachers with one-to-one mentoring and intensive professional development to develop more effective teaching strategies.

3 The MfA Fellowship gives people entering mathematics teaching a professional community where they can learn and interact with people like themselves who are the brightest in the field.

4 All of MfA's fellowships enable new teachers and strong veterans alike to exchange ideas and approaches, best practices and innovations that they can take back to their classrooms while also engaging in a larger, shared mission.

5 By attracting and supporting excellent math teachers throughout their careers, MfA improves outcomes for generations of students and changes perceptions about the value of mathematics.

Could you be an MfA Fellow?
