

ADDRESS

Department of Physics
University of Central Florida campus office: PSB 457
4111 Libra Drive email: mucciolo@ucf.edu (w) e.mucciolo@gmail.com (p)
Orlando, FL 32816-2385, USA <https://sciences.ucf.edu/physics/mucciolo/>

EDUCATION

Doctor of Philosophy (Ph.D.):

Physics, August 1994, Massachusetts Institute of Technology, Cambridge, MA, USA.
Thesis: *Universal Correlations in the Quantum Spectra of Chaotic Systems and Exactly Solvable Many-Body Problems*. Adviser: Boris L. Altshuler (currently at Columbia University)

Master of Science (M.S.):

Nuclear Physics, December 1988, University of São Paulo, São Paulo, Brazil
Dissertation: *Double Gamma Decay in ^{90}Zr* . Adviser: Otaviano A. M. Helene (retired)

Bachelor of Science (B.S.):

Physics, December 1986, University of São Paulo, São Paulo, Brazil

EMPLOYMENT

- *Chair*: Department of Physics, University of Central Florida (May 2016 – May 2021).
- *Professor*: Department of Physics, University of Central Florida (since August 2010).
- *Associate Professor*: Department of Physics, University of Central Florida (December 2003 – July 2010).
- *Visiting Associate Professor*: Department of Physics, Duke University, Durham, NC (December 2002 – December 2003).
- *Associate Professor*: Department of Physics, Pontifical Catholic University of Rio de Janeiro (PUC-RJ) (October 2002 – December 2005). On leave December 2002 – December 2005.
- *Assistant Professor*: Department of Physics, PUC-RJ (August 1996 – September 2002).
- *Post-doctoral Fellow*: NORDITA, Denmark (September 1994 – July 1996).
- *Research Assistant*: Department of Physics, Massachusetts Institute of Technology (March – August 1994).

PUBLICATIONS¹

Papers in peer-reviewed international indexed journals (102)

123. J. Nieminen, S. Dhara*, W.-C. Chiu*, E. R. Mucciolo, and A. Bansil, *Atomistic modeling of a superconductor-transition-metal dichalcogenide-superconductor Josephson junction*, Physical Review B **107**, 174524 (2023). 16 pages.
122. S. Dhara*, G. Goldstein[†], C. Chamon, and E. R. Mucciolo, *Logical Majorana zero modes in a nanowire network*, Physical Review B **107**, 075402 (2023). 12 pages
121. P. Jouzdani, C. W. Johnson, E. R. Mucciolo, and I. Stetcu, *Alternative approach to quantum imaginary time evolution*, Physical Review A **106**, 062435 (2022). 15 pages.

Patents (3)

3. E. Mucciolo and C. Chamon, *Techniques for Securely Executing Code that Operates on Encrypted Data on a Public Computer*. US Patent 11,461,435 (October 4, 2022).
2. C. Chamon, E. Mucciolo, A Ruckenstein, Z.-C. Yang*, *Systems and Methods for Universal Reversible Computing*, Patent Pub No. US 2019/012134 A1 (April 25, 2019).
1. C. Chamon and E. Mucciolo, *Systems and Methods for Virtual Parallel Computing using Matrix Product States*, US Patent No. 9355363 B2 (May 31, 2016); Pub. No. US2014/0223147 A1 (August 7, 2014).

FUNDING AND RESEARCH GRANTS**Department of Energy, Basic Energy Sciences, USA (1)**

28. *Design, Control and Application of Next-Generation Qubits*, grant DE-SC0019275.
 PI: A. Bansil (Northeastern University). Co-PIs: C. Chamon (Boston University), A. Feingun (Northeastern University), L. Fu (MIT), E. Mucciolo (UCF), and Q. Yan (Temple University). Amount: \$3,540,000 (October 2018 – September 2021). Participation: 10%.

Office of Naval Research, USA (1)

27. *Physical Limitations of Quantum Information Processing*, grant #10024674.
 PI: E. Mucciolo (UCF). Co-PI: H. Baranger (Duke University). Amount: \$400,000 (October 2008 – August 2013). Participation: 60%.

Air Force Office of Scientific Research, USA (1)

26. *Thermoelectric phenomena in quasi 1-dimensional metals*. PI: K. Coffey (UCF). Co-PIs: W. Kaden (UCF), P. Schelling (UCF), and E. Mucciolo (UCF). Amount: \$255,166 (December 2017 – March 2020). Participation: 25%. Subaward from Columbia University.

National Science Foundation, USA (9)

25. *Collaborative Research: Advancing Quantum Education by Adaptively Addressing Misconceptions in Virtual Reality*, Award IIS 23216. PI: R. McMahan (UCF). Senior Personnel: E. Mucciolo (UCF). Amount: \$499,673 (August 2023 – July 2026). Participation: 8%.
24. *EAGER: Collaborative Research: Tensor Network Methods for Quantum Simulations*, Award CCF 1844434. PI: E. Mucciolo (UCF). Amount: \$109,222 (October 2018 – September 2020). Participation: 100%.
23. *E2CDA: Type I: Collaborative Research: Interconnects Beyond Cu*. Award ECCS 1740228. PI: K. Coffey (UCF). Co-PIs: T. Jiang, W. Kaden, P. Schelling, and E. Mucciolo (UCF). Amount: \$234,497 (September 2017 – August 2021). Participation: 20%. Jointly sponsored by the Semiconductor Research Corporation.
22. *AF: Small: Is the Simulation of Quantum Many-Body Systems Feasible on the Cloud?* Award CCF 1525943. PI: P. Wocjan (UCF). Co-PIs: D. Marinescu (UCF) and E. Mucciolo (UCF). Amount: \$385,434 (August 2015 – July 2018). Participation: 25%.
21. *Spin Injection and Manipulation in Graphene-based Spintronics Devices*. Award ECCS 1402990. PI: E. del Barco (UCF). Co-PI: E. Mucciolo (UCF). Amount: \$360,000 (June 2014 – May 2017). Participation: 35%.
20. *Robustness of Topological Quantum Memories*. Award CCF 1117241. PI: E. Mucciolo (UCF). Amount: \$223,000 (July 2011 – June 2015). Participation: 100%. REU supplement: \$16,000 (August 2014).
19. *The Origin of Resistance in Nanotubes: Semi-classical to Quantum Transport in One-Dimension*. Award DMR 1006230. PI: M. Ishigami (UCF). Co-PI: E. Mucciolo (UCF). Amount: \$225,000 (July 2010 – June 2013). Participation: 25%.

18. *Molecular Spintronics with Single-Molecule Magnets*. Award ECCS 1001755. PI: E. del Barco (UCF). Co-PI: E. Mucciolo (UCF). Amount: \$400,000 (May 2010 – April 2013). Participation: 30%.
17. *Is Resilient Quantum Computing in Solid-State Systems Possible?* Award CCF 0523603. PI: E. Mucciolo (UCF). Co-PI: D. Marinescu (UCF). Amount: \$200,000 (August 2005 – July 2009). Participation: 60%.

I²Lab, University of Central Florida, USA (1)

16. *Decoherence, Scalability, and Fault-Tolerant Quantum Computation in Solid-State Systems* (November 2005). Supplemental funds provided to the NSF award CCF 0523603. PI: E. Mucciolo (UCF). Co-PI: D. Marinescu (UCF). Amount: \$16,000 (FY 2006). Participation: 50%.

FAPERJ, Brazil (The State of Rio de Janeiro Research Foundation) (4)

15. *Transport Properties in Electronic Mesoscopic Systems* (March 2001). Grant for supporting a short-term visiting professor at PUC-RJ. PI: E. Mucciolo (PUC-Rio). Amount: R\$2,460 (US\$1,200 approx.).
14. *Mesoscopic Systems: Phase Coherence, Chaos, Disorder, and Interactions in Micro and Nano Electronic Structures* (May 2000). Young Scientist Award. PI: E. Mucciolo (PUC-Rio). Amount: R\$14,500 (US\$7,900 approx.).
13. *XXI National Condensed Matter Physics Meeting of the Brazilian Physical Society* (May 1998). Grant for partial support of the event. PI: E. Mucciolo (PUC-Rio). Amount: R\$19,500 (US\$17,000 approx.).
12. *Renewal of the Computer Network at the Physics Department of the Pontifical Catholic University: Connecting Teaching and Research* (February, 1998). Grant for the acquisition of equipment and materials. PI: E. Mucciolo (PUC-Rio). Amount: R\$10,000 (US\$8,800 approx.).

Participation in other group funded projects in Brazil and in the USA (11)

11. NSF *Collaborative Research: Advancing Quantum Education by Adaptively Addressing Misconceptions in Virtual Reality*, Award IIS 2302816. PI: R. McMahan (UCF). Senior personnel: E. Mucciolo (UCF). Amount: \$451,673 (August 2023 – July 2026). Participation: 13%.
10. NIST SBIR Phase I: *Establishing the Security of Ciphers Designed Using Statistical Physics Principles to Enable Direct Computation on Encrypted Data*. Award 70NANB22H188. PI: L. Veltri (USEncryption). Senior personnel: C. Chamon and E. Mucciolo (USEncryption). Amount: \$99,999 (October 2022 – March 2023).
9. NSF SBIR Phase I: *Enabling Computation on Encrypted Data on the Cloud and Beyond*. PI: L. Veltri (USEncryption). Senior personnel: C. Chamon and E. Mucciolo (USEncryption). Amount: \$224,800 (October 2019 - September 2020).
8. *Spin Transport in Quantum Dots*, (February 2006). American Physical Society Travel Grant Award Program. PI: C. Lewenkopf (UERJ, Brazil). Co-PI: E. Mucciolo (UCF). Amount: \$2,000.

7. *A High-Performance Computer Cluster for Nanophysics Simulations* (January, 2005). UCF Presidential Initiative – Equipment Funding Award (matched by startup funds from the PIs). PI: K. Busch (UCF). Co-PI: E. Mucciolo (UCF). Amount: \$34,500.
6. *Research Network on Nanostructured Materials* (December, 2001). Project involving several Brazilian institutions, sponsored by CNPq. PI: I. Baumvol (UFRG). Amount: R\$750,000 (US\$300,000 approx.). Participation: Co-PI.
5. *Nanoscience Institute* (October 2001 – September 2004). Project involving several Brazilian institutions, sponsored by the Brazilian Ministry for Science and Technology. PI: A. S. Chaves (UFMG). Amount: R\$ 4,600,000 (US\$ 1,700,000 approx.). Participation: one of many Co-PIs.
4. *Experimental Study and Theoretical Modeling of Energy Losses in Air-Conditioning* (August 2001 – July 2003). Project sponsored by Light S.A., the local electricity distribution company in Rio de Janeiro. PI: E. Bezerra (Light S.A.). Co-PIs: E. Mucciolo (PUC-RJ), C. Cesar (UFRJ), and M. Cruz (UFRJ). Amount: R\$350,000 (US\$140,000 approx.).
3. *Materials for Nanotechnology* (September 2001 – August 2004). Project involving several institutions in the Rio de Janeiro State, sponsored by FAPERJ. PI: H. Brandi (UFRJ). Amount R\$450,000 (US\$170,000 approx.). Participation: Co-PI.
2. Co-PI, *Decoherence Effects in Mesoscopic Systems* (August 2000). Award by the Trilateral Cooperation Program of the Vitae Foundation. PI: C. Lewenkopf (UERJ). Co-PI: E. Mucciolo. Amount R\$ 18,000 (US\$ 10,000 approx.).
1. Co-PI, *Hamiltonian Systems: Chaos and Quantization* (January 1998 – December 2003). “Center of Excellence” (PRONEX) award by the Brazilian Federal Government. PI: A. M. Ozorio de Almeida (CBPF). Co-PIs: C. Lewenkopf (UERJ), E. Mucciolo (PUC-RJ), M. A. M. Aguiar (UNICAMP), and M. C. Nemes (UFMG). Amount: R\$250,000 (US\$220,000 approx.).

INVITED PRESENTATIONS

In conferences, workshops, and schools (34)

111. Panelist: *The Intern: Undergraduate Student Breakout Session*, Quantum Information Science Career Fair 2023, virtual (September 2023).
110. Panelist: *Building the Quantum Computer & Supply Chains*, National Quantum Literacy Conference, Annapolis, MD (October 2022).
109. *Machine Learning Regression for Many-Body Operator Dynamics*, Conference on Real-space Simulations of Topological Matter and Disordered Materials, Institute of Physics, U.K., virtual (October 2021).
108. *Quantum vertex model for reversible classical computing*, IBM Quantalab Quantum Computing School, INL, Braga, Portugal (October 2018).
107. *Solving computational problems by annealing a planar quantum vertex model*, 6th Mexican Meeting on Mathematical and Experimental Physics, El Colegio Nacional, Mexico City, Mexico (September 2016).
106. *Critical delocalization of chiral zero energy modes in graphene*, International Symposium on Recent Developments on 2D Materials Research: Theory and Experiment, University of York, York, U.K. (May 2016).
105. Panelist: *Professional development and undergraduate career options to mentees*, National Mentoring Community & Bridge Program Conference, American Physical Society, Miami, FL (October 2015).
104. *Irreversibility and entanglement spectrum statistics in quantum circuits and many-body systems*, 38th Condensed Matter Physics Annual Meeting, Brazilian Physical Society, Foz do Iguaçu, Brazil (May 2015).
103. *Unified description of electronic transport in graphene based on resonant scatterers*, Asia-Pacific Centre for Theoretical Physics: Conference on Localisation, Pohang, South Korea (August 2011).
102. *Resonant impurity scatterers and dc conductivity in graphene*, Boston-Area Carbon Nanoscience Annual Workshop, Boston, MA, USA (June 2011).
101. *Probing the dominant scatterers in graphene via hydrogenation*, Advanced Materials Science Workshop on Metal-Insulator Transitions in Disordered and Magnetic Systems, Pohang, South Korea (September 2010).
100. *For how long is it possible to quantum compute?*, Workshop on Quantum Algorithms, Computational Models, and Foundations of Quantum Mechanics, University of British Columbia, Vancouver, Canada (July 2010)
99. *Kondo effect in single-molecule magnets*, 3rd Workshop on Current Trends in Molecular and Nanoscale Magnetism, Orlando, FL, USA (June, 2010)
98. *Physical limitations of quantum information processing*, Workshop on Quantum Information, Office of Naval Research, Shepherdstown, WV, USA (May 2010).
97. *Phonon decoherence in semiconductor charge qubits*, 13th International Conference on Vibrations at Surfaces, University of Central Florida, Orlando, USA (March 2010)

96. *Numerical methods and simulations for graphene-based electronic devices*, Workshop on Centre for Carbon Science and Technology, National University of Singapore, *Singapore* (September 2009).
95. Two talks: *Conductivity of disordered graphene; Kondo effect of magnetic molecules*. Advanced Materials Science Workshop on Correlations in Disordered Materials, POSTECH, *Pohang, South Korea* (August 2009).
94. *Physical limitations of quantum information processing*, Workshop on Quantum Information, Office of Naval Research, *Washington DC, USA* (May 2009).
93. *Electronic transport in disordered graphene sheets and nanoribbons*, American Physical Society March Meeting, *Pittsburgh, USA* (March 2009).
92. *Universal and non-universal scaling of the conductivity in disordered graphene*, Workshop on Delocalization Transitions and Multicriticality, Isaac Newton Institute for Mathematical Sciences, *Gregynog Hall, UK* (November 2008).
91. *Conductance suppression in disordered graphene nanoribbons*, Workshop on the Physics of Graphene, Aspen Center for Physics, *Aspen, CO, USA* (June 2008).
90. *Carbon-based devices for high-speed microelectronics*, group leader presentation, Workshop on Carbon Electronics for Radio-Frequency Applications, DARPA, *Arlington, VA, USA* (April 2007).
89. *Coherent spin transport and spin pumping*, lecture, CFN Summer School on Nanoelectronics, *Bad Herrenalb, Germany* (September 2005).
88. *Adiabatic pumping of spin currents with quantum dots*, American Physical Society March Meeting, *Montreal, Canada* (March 2004).
87. *Ferromagnetic instability in two-dimensional disordered metals*, Workshop on Strange Metals, ICCMP, *Brasília, Brazil* (November 2002).
86. *Quantum dot spin pump*, Workshop of the Nanostructured Materials Research Network - Theory Group, *São Paulo, Brazil* (October 2002).
85. *Adiabatic spin pumping*, Workshop on Mesoscopic Physics and Electron Interaction, ICTP, *Trieste, Italy* (June 2002).
84. *Adiabatic spin pumping with quantum dots*, Workshop of the Nanostructured Materials Research Network - Semiconductor Group, *Belo Horizonte, Brazil* (April 2002).
83. *Chaos and interactions in quantum dots*, lecture, VII Brazilian School on Electronic Structure *Goiânia, Brazil* (July 2000).
82. *Electronic transport in CDW-metal junctions*, II Workshop on Electronic Transport in Mesoscopic Systems, *Mérida, Venezuela* (September 1999).
81. Lecture on Mesoscopic Physics, II Workshop on Electronic Transport in Mesoscopic Systems, *Mérida, Venezuela* (September 1999).
80. *Electronic transport in CDW-metal junctions*, International Conference on Spin Ladders and Low-Dimensional Strongly Correlated Systems, ICCMP, *Brasília, Brazil* (September 1999).
79. Workshop on Nonlinear Dynamics and Chaos in Physical and Biological Systems, *São Paulo, Brazil* (October 1997).

78. VIII Brazilian Workshop on Semiconductor Physics, *Águas de Lindóia, Brazil* (February 1997).

In universities and research institutions (77)

77. *Atomistic modeling of superconductor-TMD-superconductor Josephson junctions*, seminar, Institute of Physics, Fluminense Federal University Niterói, *Brazil* (May 2023).
76. *Alternative approach to quantum imaginary time evolution*, virtual seminar, Institute of Physics, Fluminense Federal University Niterói, *Brazil* (October 2022).
75. *Extended Temporal Prediction of Expectation Values via Machine Learning*, virtual seminar, Institute of Physics, Federal University of Uberlandia, *Uberlandia, Brazil* (September 2021)
74. *New Developments at the Interface between Physics and Computer Science*, seminar, Department of Physics, Emory University, *Atlanta, GA, USA* (December 2018).
73. *Entanglement Complexity and Irreversibility in Classical and Quantum Circuits*, seminar, Department of Physics, Instituto Superior Técnico, *Lisbon, Portugal* (November 2018).
72. Two lectures: *Quantum Computation: How it works, What it can do, and Where it stands*; and *New Developments at the Interface between Physics and Computer Science*; School of Engineering, University of Porto, *Porto, Portugal* (November 2018).
71. *New Developments and Ideas at the Interface between Physics and Computer Science*, colloquium, Department of Physics, Florida State University, *Tallahassee, FL, USA* (October 2017).
70. *Solving Classical Computational Problems by Annealing a Planar Quantum Vertex Model*, University of York, *York, U.K.* (May 2016).
69. *Irreversibility and Entanglement Spectrum Statistics in Quantum Circuits and Many-Body Systems*, Fluminense Federal University, *Niteroi, Brazil* (June 2015).
68. *Irreversibility and Entanglement Spectrum Statistics in Quantum Circuits and Many-Body Systems*, Brazilian Center of Physics Research, *Rio de Janeiro, Brazil* (June 2015).
67. *Irreversibility and entanglement spectrum statistics in quantum circuits*, Naval Research Laboratory, *Washington DC, USA* (October 2014).
66. *Irreversibility and entanglement spectrum statistics in quantum circuits*, Perimeter Institute, *Waterloo, Canada* (September 2014).
65. *A new approach to teaching physics*, colloquium, Institute of Physics, Fluminense Federal University, *Niterói, Brazil* (June 2013).
64. *Rényi entropies, counting problems, and matrix computing*, Institute of Physics, Fluminense Federal University, *Niterói, Brazil* (May 2013).
63. *Virtual parallel computing with matrix product states*, Federal University of ABC, *Santo André, Brazil* (July, 2012).
62. *Virtual parallel computing with matrix product states* University of São Paulo, *São Paulo, Brazil* (July, 2012).
61. *Virtual parallel computing with matrix product states* Fluminense Federal University, *Niterói, Brazil* (June, 2012).

60. *Virtual parallel computing with matrix product states* Federal University of Rio de Janeiro, Rio de Janeiro, Brazil (June, 2012).
59. *Virtual parallel computing with matrix product states* Naval Research Laboratory, Washington D.C., USA (June 2012).
58. *Resonant scatterers and electronic transport in graphene*, School of Physics, Trinity College, Dublin, Ireland (December 2011).
57. *A unified description of electronic transport in graphene based on resonant scatterers*, National High Magnetic Field Laboratory, Tallahassee, FL, USA (November 2011).
56. *Quantum information processing: What is new and what is possible*, colloquium, Department of Physics and Astronomy, University of North Carolina, Chapel Hill, NC, USA (November 2010).
55. Two seminars: *Long-time dynamics of quantum computers in the presence of correlated errors*; and *Kondo and Coulomb blockade effects in single molecule magnets*. Department of Physics and Astronomy, University of British Columbia, Vancouver, Canada (March 2009).
54. *Electronics with single-molecule magnets*, colloquium, Department of Physics, University of Ohio, Athens, OH, USA (October 2008).
53. *Electronic transport in disordered graphene*, seminar, Department of Physics, University of Regensburg, Regensburg, Germany (July 2008).
52. *Electronics and spintronics with single-molecule magnets*, seminar, Institute of Applied Physics, Hamburg University, Hamburg, Germany (July 2008).
51. *Simulations and numerical modeling of electronics transport in disordered graphene*, seminar, Department of Physics, University of California, San Diego, CA, USA (May 2008).
50. *Simulations and numerical modeling of electronics transport in disordered graphene*, seminar, Department of Physics, University of California, Riverside, CA, USA (May 2008).
49. *Simulations and numerical modeling of electronics transport in disordered graphene*, seminar, Department of Physics, Stanford University, Palo Alto, CA, USA (May 2008).
48. *Graphene*, lecture, Department of Chemistry, University of Central Florida, Orlando, FL, USA (April, 2008).
47. *Conductivity and Fano factor in disordered graphene*, seminar, Department of Physics, Duke University, Durham, NC, USA (January 2008).
46. *Electronics with single-molecule magnets*, seminar, Institute for Theoretical Solid-State Physics, Karlsruhe University, Karlsruhe, Germany (June 2007).
45. *Electronics with single-molecule magnets*, seminar, Institute of Theoretical Physics, University of Hamburg, Hamburg, Germany (June 2007).
44. A series of three seminars on my research activities, Max-Planck Institute for the Physics of Complex Systems, Dresden, Germany (June 2007).
43. *Quantum oscillations in the conductance of a single-molecule magnet*, seminar, Department of Physics. Ohio State University, Columbus, OH, USA (May 2007).
42. *Electronics with single-molecule magnets*, seminar, Department of Physics. Boston University, Boston, MA, USA (February 2007).

41. *Electronics with single-molecule magnets*, colloquium, Physics Department, University of Waterloo, *Waterloo, Canada* (February 2007).
40. *Berry phase oscillations of the Kondo effect in single-molecule magnets*, seminar, Department of Physics, University of Florida, *Gainesville, FL, USA* (January 2007).
39. *Berry phase oscillations of the Kondo effect in single-molecule magnets*, seminar, Theory Division, Los Alamos National Laboratory, *Los Alamos, NM, USA* (May 2006).
38. *Phonon decoherence in quantum dot qubits*, seminar, Institute of Physics, State University of Rio de Janeiro, *Rio de Janeiro, Brazil* (December 2005).
37. *Quantum spin pumping*, seminar, Condensed Matter Science Division, Oak Ridge National Laboratory, *Oak Ridge, TN, USA* (November 2005).
36. *Quantum spin pumping*, seminar, Department of Physics, Karlsruhe University, *Karlsruhe, Germany* (May 2005).
35. *Quantum spin pumping*, seminar, Department of Physics, Ludwig-Maximilians University, *Munich, Germany* (May 2005).
34. *Quantum spin pumping*, seminar, Department of Physics, Heinrich-Heinz University, *Düsseldorf, Germany* (May 2005).
33. *Quantum spin pumping*, seminar, Institute for Theoretical Physics, Hamburg University, *Hamburg, Germany* (May 2005).
32. *Exploring non-equilibrium phenomena in quantum dots, wires, and alike*, colloquium, Department of Physics, University of Central Florida, *Orlando, FL, USA* (April 2005).
31. *Quantum pumping*, colloquium, Department of Physics, Florida State University, *Tallahassee, FL, USA* (January 2005).
30. *Quantum adiabatic pumping of charge, spin, and heat*, seminar, Department of Physics, New York University, *New York, NY, USA* (October 2004).
29. *Quantum adiabatic pumping of charge, spin, and heat*, seminar, Brazilian Center for Physical Research, *Rio de Janeiro, Brazil* (June 2004).
28. *Quantum spin pumping*, colloquium, Department of Physics, University of Central Florida, *Orlando, FL, USA* (March 2003).
27. Seminar, Institute of Physics, University of Campinas, *Campinas, Brazil* (October 2002).
26. *Quantum spin pumping*, seminar, Department of Physics, Pontifical Catholic University, *Rio de Janeiro, Brazil* (September 2002).
25. Colloquium, Department of Physics, University of Central Florida, *Orlando, FL, USA* (February 2002).
24. Colloquium, Department of Physics, Ohio University, *Athens, OH, USA* (February 2002).
23. Seminar, Department of Physics, Duke University, *Durham, NC, USA* (February 2002).
22. Colloquium, Department of Physics, Pontifical Catholic University, *Rio de Janeiro, Brazil* (April 2001).
21. Seminar, Institute of Physics, University of Campinas, *Campinas, Brazil* (August 2000).

20. Colloquium, Institute of Physics, Fluminense Federal University, *Niterói, Brazil* (May 2000).
19. Seminar, Institute of Physics, Federal University of Rio de Janeiro, *Rio de Janeiro, Brazil* (October 1999).
18. Seminar, Institute of Physics, State University of Rio de Janeiro *Rio de Janeiro, Brazil* (June 1999).
17. Seminar, Institute of Physics, University of Campinas, *Campinas, Brazil* (November 1998).
16. Seminar, Linear Accelerator Laboratory, University of São Paulo, *São Paulo, Brazil* (May 1998).
15. Colloquium, Department of Physics, Federal University of Minas Gerais, *Belo Horizonte, Brazil* (November 1997).
14. Seminar, Department of Physics, Federal University of Minas Gerais, *Belo Horizonte, Brazil* (November 1997).
13. Seminar, Institute of Physics, University of Rio de Janeiro, *Rio de Janeiro, Brazil* (May 1997).
12. Seminar, Institute of Physics, Fluminense Federal University, *Niterói, Brazil* (April 1997).
11. Seminar, Brazilian Center for Physical Research, *Rio de Janeiro, Brazil* (November 1996).
10. Seminar, Department of Physics, Pontifical Catholic University, *Rio de Janeiro, Brazil* (October 1996).
9. Seminar, University of Essen, *Essen, Germany* (June 1996).
8. Seminar, Institute of Physics, University of São Paulo, *São Paulo, Brazil* (March 1996).
7. Seminar, Institute of Physics, University of Campinas, *Campinas, Brazil* (March 1996).
6. Seminar, Department of Physics, Pontifical Catholic University, *Rio de Janeiro, Brazil* (March 1996).
5. Seminar, Institute of Physics and Astronomy, Aarhus University, *Aarhus, Denmark* (May 1995).
4. Seminar, Max-Planck Institute for Solid State Physics, *Stuttgart, Germany* (January 1995).
3. Seminar, Max-Planck Institute for Nuclear Physics, *Heidelberg, Germany* (January 1995).
2. Seminar, NORDITA & Niels Bohr Institute, *Copenhagen, Denmark* (October 1994).
1. Seminar, Institute of Physics, University of São Paulo, *São Paulo, Brazil* (May 1988).

PROFESSIONAL EXPERIENCE**Teaching**

- At the Department of Physics, University of Central Florida:
 16. PHY 4932, *Special Topics: Quantum Information Processing* (Spring 2022, Spring 2023)
 15. PHY 4932, *Special Topics: Advanced Mechanics* (Fall 2015).
 14. PHY 3320, *Mechanics I* (Spring 2015, Spring 2016).
 13. PHY 2048, *Physics for Engineers and Scientists I* – SCALE-UP mode: Fall 2011, Spring 2012, Fall 2012, Spring 2013, Fall 2013, Spring 2014).
 12. PHY 5524, *Statistical Physics* (Spring 2011).
 11. PHY 3513, *Thermodynamics and Statistical Physics* (Fall 2010).
 10. PHY 4605, *Wave Mechanics II* (Spring 2009, Spring 2010).
 9. PHY 4604, *Wave Mechanics I* (Fall 2008, Fall 2009).
 8. PHY 6624, *Quantum Mechanics II* (Spring 2007, Spring 2008).
 7. PHY 5606, *Quantum Mechanics I* (Fall 2006, Fall 2007).
 6. PHY 6939, *Graduate Research Seminar* (Summer 2006).
 5. PHY 2048, *Physics for Engineers and Scientists I* (Spring 2006, Fall 2023).
 4. PHZ 5405, *Condensed Matter Physics* (Fall 2005).
 3. PHY 5650, *Special Topics: Introduction to Quantum Computation* (Spring 2005).
 2. PHY 6246, *Classical Mechanics* (Fall 2004, Fall 2015).
 1. PHY 5524, *Statistical Physics* (Spring 2004).

- At the Department of Physics, Duke University:
 1. PHYSICS 307, *Introduction to Condensed Matter* (Fall 2003). Graduate level.

- At the Department of Physics, Pontifical Catholic University:
 10. *Quantum Mechanics II* (2002). Senior level.
 9. *Quantum Mechanics I* (2001 and 2002). Senior level.
 8. Laboratory, *Physics 2* (2000). Freshman level.
 7. Laboratory, *Physics 4* (2000). Sophomore level.
 6. Laboratory, *Physics 3* (four consecutive semesters, from 1998 to 2001; also in 2002). Sophomore level.
 5. *Electromagnetism III* (1999 and 2001). Graduate level.
 4. *Statistical Mechanics* (2000). Graduate level.
 3. *Statistical Physics* (1998, 1999, 2000). Senior level.
 2. *Electronic Transport in Mesoscopic Systems* (taught jointly with C. Lewenkopf) (1997). Graduate level.
 1. *Physics 4* (four successive semesters, from 1996 to 1998). Sophomore level.

- At the Department of Physics, Massachusetts Institute of Technology:
 1. Teaching Assistant of Prof. Boris Altshuler in the graduate course *Solid State Theory* (Fall 1991).

Supervision of graduate students at UCF

22. Andrew Silverman, Ph.D. student. Project: *Supercurrents in novel Josephson junctions* (since August 2023).
21. Arslan Hashim, Ph.D. student. Project: *Quantum neural networks* (since January 2023).
20. Suman Mandal, Ph.D. student. Project: *Origins of barren plateaux in variational quantum algorithms* (since August 2021).
19. João Pedro dos Santos Pires, visiting Ph.D. student. Project: *Disordered Weyl semimetals* (June – July 2019). Consultant with Deloitte, Portugal.
18. Sayandip Dhara, Ph.D. dissertation: *Methods and Characterization of Topological and Disordered-Induced Protection of Coherence in Quantum Systems* (December 2022). Post-doctoral associate at New York University.
17. George Davila, M.S. student. Project: *Compressing DNA databses with matrix product states* (March 2017 – July 2018).
16. Tyler Campbell, Ph.D. student. Project: *Computation via thermal annealing of vertex models* (May 2016 – October 2016).
15. Justin Reyes, Ph.D. dissertation: *Tensor Network States: Optimizations and Applications in Quantum Many-Body Physics and Machine Learning* (July 2020). Post-doctoral associate at the Laser Plasma Laboratory, University of Central Florida.
14. William Richardson, Ph.D. candidate. Project: *Electronic structure and transport in metallic nanometer interconnects* (since November 2015).
13. Angel Martínez Argüello, visiting Ph.D. student. Project: *Are entanglement fluctuations universal?* (March 2015). CONACYT fellow from the Universidad Autonoma Metropolitana, Mexico.
12. Emilia Ridolfi, visiting Ph.D. student. Project: *An accurate tight-binding model for MoS₂* (September – November 2014). Currently a post-doctoral associate at the Université Libre de Bruxelles, Belgium.
11. Daniel Bonior, Ph.D. dissertation: *Mathematical foundations of adaptive quantum processing*; co-advisor: Keye Martin (October, 2018). Research scientist at the Naval Research Laboratory in Washington DC.
10. Leandro Lima, visiting Ph.D. student. Project: *Recursive electronic transport calculations in interacting and disordered wires* (August – October 2012). CNPq fellow from the Federal University of Rio de Janeiro, Brazil. Currently an assistant professor at UFRRJ, Brazil.
9. Sabine Pelton, Ph.D. dissertation: *Solving constraint satisfaction problems with matrix product states* (August 2017). Ridgerunner at Shenandoah National Park.
8. Guilherme Martins, visiting M.S. student. Project: *Fidelity decay of a spin lattice in a correlated environment* (November – December 2011). SBF-APS fellowship recipient from the Federal University of Sergipe, Brazil. Ph.D. in physics from UFS, Brasil; currently an assistant professor at UFA, Brazil.
7. Amin Ahmadi, Ph.D. dissertation: *Charge and spin transport in low-dimensional materials* (April 2017). Currently working at a big data startup in Sweden.

6. Javier Romero. Ph.D. dissertation: *Electronic transport in single-molecule magnet transistors* (July 2014). APS-SBF fellowship recipient (July 2013). Currently working toward an MS degree in STEM Education at Tufts University.
5. Pejman Jouzdani. Ph.D. dissertation: *Fault tolerance in topological quantum memories* (November 2014). Scientist at General Atomics, CA.
4. Sabine Pelton. M.S. thesis: *Spin pumping with double quantum dots* (March 2012).
3. Diego C. Valente. Ph.D. dissertation: *Decoherence in Semiconductor Solid State Quantum Computers* (October 2009). Lecturer at University of Connecticut.
2. James McCracken. M.S. thesis: *Decoherence in Quantum Dot Charge Qubits: the Role of Electromagnetic Fluctuations*. (April 2006). Currently a consultant in the Washington DC area.
1. Michael D. Hogue. Ph.D. dissertation: *Insulator-Insulator Contact Charging as a Function of Pressure* (November 2005). Member of the technical staff at the NASA Kennedy Space Center, FL (retired).

Supervision of undergraduate students at UCF

15. Zehra Baqri, Physics major. Project: *Quantum neural networks*. (since August 2023).
14. Maximillian Daughtry, Physics major. Project: *Barren plateau in variational quantum algorithms*. (since August 2023).
13. Luke Anderson, Computer Engineering major. Project: *Machine learning for quantum error correction*. (since August 2023).
12. Mikhail Gotmare, Physics major. Project: *Matrix product state quantum circuit simulator*. (January – April 2023).
11. Jesse Jones Johnson, B.S. in Physics, 2023. Project: *Quantum error correction via machine learning*. (January – April 2023).
10. Peter Smucz, B.S. in Physics, 2022. Project: *Alternative approach to quantum imaginary time evolution*. (May – July 2022).
9. Antonett Nunez del Prado, B.S. in Physics, 2019. Project: *Entanglement complexity in SAT problems*. (August 2015 – May 2019). Currently a Ph.D. student at UCLA.
8. Kursti DeLello, B.S. in Physics, 2016. Projects: *Phase transitions in counting problems; Electronic structure and electronic transport in phosphorene – Honors in the Major thesis*. (February 2014 – May 2016). Currently a Ph.D. student at Cornell University.
7. Alexander Stanforth, B.S. in Physics, 2017. Projects: *A Monte-Carlo method for evaluating the permanent of Hermitian matrices; Statistical properties of random permutation gates and Fidelity threshold in the surface code over multiple cycles* (January 2013 – April 2017). Currently a medical physics assistant at Emory Healthcare, Atlanta, GA.
6. Richard Bergmann, B.S. in Physics, 2015. Project: *Variational matrix product state solution of spin chain problems*. (August 2013 – May 2015). Software engineer with COLSA.
5. Thomas Evaskis, Physics & Math major. Project: *Phase transitions in the #2-SAT class of problems* (August – December 2012).

4. Evelyn Strunk, B.S. in Physics, 2013. Project: *Percolation and electrical conductance in graphene oxide* (May 2012 – May 2013). Currently at Lockheed-Martin, Orlando, FL.
3. Stephen Wood, Physics major. Project: *Artificial magnetic fields and strain in graphene* (August – December 2010).
2. Jonathan Edmiston, Physics major. Project: *Transfer-matrix calculation of conductance in graphene nanoribbons* (August – December 2009). Currently at Qorvo, Orlando, FL.
1. William Cole, B.S. in Physics, 2008. Project: *Weak localization in disordered graphene* (August 2007 – May 2008). Currently a Researcher at Microsoft Q Station in Santa Barbara, CA.

Supervision of students at the Department of Physics, PUC-RJ

5. Bernardo S. Fernandes, *undergraduate* student (CNPq-PIBIC fellow). Project: *Development of a laboratory kit for the observation of the conductance quantum* (August 1999 – July 2000).
4. Marcelo S. Schiaffino, *undergraduate* student (CNPq-PIBIC fellow). Project: *Self-consistent confining potential in semiconductor heterostructures* (March 1999 – February 2000). Key account manager at BICS Telecomm in Brazil.
3. Kenjiro K. Gomes, *undergraduate* student (CNPq-PIBIC fellow). Project: *Description of half-filled Landau levels* (August 1997 – July 1999). Project: *Superconductivity in disordered metallic grains* (March – July 2000). M.S. dissertation (CAPES fellow) : *Spontaneous Spin Polarization in Disordered Quantum Dots* (July 2002). Co-founder, Monad, San Francisco, CA.
2. Ana Luiza Cardoso Pereira, *undergraduate* student (CNPq-PIBIC fellow). Project: *Transport and spectral fluctuations in mesoscopic structures* (August 1997 – March 1999). Faculty member at UNICAMP-Limeira. Winner of the L’Oreal Prize for Brazilian Women in Sciences.
1. Marco e Silva de Melo Távora (CAPES and CNPq fellow). M.S. dissertation: *Vortex States in Unconventional Superconductors* (September 2002). Founder, Principia Technologies, Brazil.

Supervision of postdoctoral fellows

1. Justin Reyes, NSF Mathematical and Physical Sciences Ascending Postdoctoral Research fellow (January 2022 – July 2023). Currently a visiting lecturer at UCF.
2. Carlos Paez, FAPESP fellow (September 2015 – June 2016). visiting from UNICAMP, Brazil. Currently an assistant professor in Colombia.
3. Alejandro M. F. Rivas, FAPERJ fellow (May 1999 – April 2001). Currently a member of the technical staff at the Tandem National Laboratory, Argentina.

Administrative activities

- At UCF:
 - Chair/Head, Department of Physics (May 2016 – May 2021).
 - Director of the Physics Graduate Program (December 2004 – July 2006)

- At the Department of Physics, PUC-RJ:
 - Director of the Graduate Program (December 2000 – August 2002)

Institutional service

- At UCF:
 - Member of the College of Sciences Technology Advisory Committee (since May 2023).
 - Member of the Attosecond Theory faculty search committee, Department of Physics (December 2022 – April 2023).
 - Co-chair, UCF Research Cyberinfrastructure Advisory Committee (since October, 2022).
 - Coordinator, computer cluster room, Department of Physics (since January 2022).
 - Member of the Lecturer search committee, Department of Physics (Jan – May 2022).
 - Member of the Global Initiatives Advisory Committee Meeting (since September 2020).
 - Member of the Quantum Optics faculty search committee, College of Optics and Photonics (Fall 2020).
 - Member of the AI + QC work group (November 2020 – April 2021).
 - Member of the Chief Information Officer search committee (September – November 2020).
 - Member of the university committee “What Will UCF Be Known For” (Fall 2019).
 - Member of the Associate Dean search committee, College of Sciences (July 2018).
 - Chair of the Psychology Department Chair search committee (February – April 2018)
 - Co-organizer of the Freshman Physics Seminar (Fall 2015 and Spring 2016).
 - Chair of the Physics Education Research faculty search committee (November 2015 – April 2016)
 - Chair of the Ultrafast Experimental Condensed Matter Physics faculty search committee (November 2014 – March 2015)
 - Member of the UCF Physics Career Day organizing team; member of the Physics Outreach Committee (2014 – 2015)
 - Member of the Physics Department’s Strategic Planning Committee (September 2011 – 2015).
 - Member of the UCF Graduate Council Policy Committee (September 2009 – March 2011).
 - Member of the UCF Faculty Senate (April 2009 – March 2011).
 - External member of the Chemistry Annual Evaluations, Procedures and Standards Committee: Criteria Revisions (January 2009).
 - Chair of the Physics Computer and Technology Committee (August 2006 – January 2007)
 - Member of the new Physical Science Building Committee (February 2006 – August 2010)
 - Member of the Physics Annual Evaluations, Procedures and Standards Committee (May 2005 – December 2005; September 2011 – August 2013)
 - Member of the Physics Department Chair search committee (March 2005 – April 2006)
 - Member of the Interdisciplinary Information Science and Technology Laboratory (I2Lab) Steering Committee (December 2004 – August 2006). Member of the fellowship subcommittee.

- Member of the Physics Graduate Program governance (August 2004 – July 2015).
- Internal reviewer of grant proposals for limited-submission solicitations.
- At the Department of Physics, PUC-RJ:
 - Member of the Graduate Committee (December 1999 – November 2000)
 - Manager of the computer network (March 1997 – February 2001)
 - Library liaison (November 1996 – February 1999)
 - Member of the Steering Committee (November 1996 – October 1999)
- Thesis and dissertation committees (excluding of own advisees):
 - External member in 6 committees in Brazil (1996 – 2015), 1 in Ireland (2012), and 1 in Germany (2013).
 - Member in many tens of committees at UCF (Computer Sciences, Mathematics, Education, Electrical Engineering, Optics and Photonics, and Physics).

Service to the profession and the community

- Member of the US Department of Energy Quantum Information Science Education Working Group (March 2021).
- Consultant, panelist, editorial, and referee work:
 - *Journal*: Quanta (since January 2023).
 - *Publisher*: Springer – editor of Tracts in Modern Physics book series (since November 2020).
 - *Journal*: Nature Quantum Information (January 2019)
 - *Journal*: IEEE Transactions on Information Theory (December 2015)
 - *Journal*: Synthetic Metals (June 2015)
 - *Publisher*: Cambridge University Press – book proposal reviewer (November 2013)
 - *Journal*: Physica Status Solidi B (October 2013)
 - *Journal*: Carbon (August 2013)
 - *Journal*: Annals of Physics (June 2013)
 - *Journal*: Journal of Computational Electronics (December 2012)
 - *Funding Agency*: CONICYT, the Chilean foundation for science and technology (July 2011)
 - *Journal*: Journal of Magnetism and Magnetic Materials (June 2011)
 - *Journal*: Reports on Progress in Physics (March 2011)
 - *Publisher*: Springer Verlag – book chapter review (August 2010)
 - *Journal*: Small (August 2010)
 - *Journal*: Applied Physics B – Laser and Optics (April 2010)
 - *Journal*: Applied Physics Letters (since September 2009)
 - *Journal*: Journal of Applied Physics (since June 2009)
 - *Journal*: Reviews of Modern Physics (since May 2009)
 - *Journal*: Journal of the American Chemical Society (since April 2009)
 - *Funding Agency*: Office of Basic Energy Sciences, Department of Energy (since April 2009)
 - *Journal*: Nano Research (August 2008)

- *Journal*: New Journal of Physics (since January 2008)
 - *Journal*: Journal of Physics: Condensed Matter (since August 2007)
 - *Journal*: Nanotechnology (since May 2007)
 - *Journal*: Physica E (May 2006)
 - *Funding Agency*: John Simon Guggenheim Foundation (February 2006)
 - *Journal*: European Journal of Physics B (since February 2006)
 - *Journal*: Europhysics Letters (since September 2005)
 - *Funding Agency*: American Chemical Society Petroleum Research Fund, (August 2005)
 - *Funding Agency*: FONCyT, the Argentinean national fund for science and technology (March 2005)
 - *Funding Agency*: National Science Foundation (since November 2004)
 - *Journal*: Chemical Physics Letters (August 2004)
 - *Journal*: Solid State Communications (since December 2003)
 - *Government Agency*: The Brazilian Ministry of Education (November 2000)
 - *Funding Agency*: FAPESP, the State of São Paulo Research Foundation, Brazil (since August 2000)
 - *Journal*: Physics Letters A (since April 1999)
 - *Funding Agency*: CNPq, the Brazilian federal agency for the promotion of science and technology (since September 1998)
 - *Journal*: Physical Review A, B, E, and Letters (since November 1994)
- Member of the National Mentoring Community program of the American Physical Society (since December 2015).
 - Outside Academia:
 - Advisory Board Member, National Quantum Literacy Network (since June 2021)
 - Volunteer, 28th Annual Science Olympiad National Tournament, Orlando, FL (May 2012)
 - Judge, U.S. Army, Navy and Air Force sponsored 46th National Junior Science Humanities Symposium (JSHS), Orlando, FL (May 2008)
 - Member of the Community Council at the Orlando Science Center, Orlando, FL (November 2004 – December 2005)

Organization of scientific and professional events

9. Local Organizer – National Mentoring Community Annual Meeting, *Orlando, FL*, February, 2020. Jointly organized with the American Physical Society.
8. Local Organizer – Inclusive Graduate Network (IGEN) National Meeting, *Orlando, FL*, October, 2019).
7. Sorting Team Leader – Complex Structured Materials; Focus Session Organizer for Graphene: Structure, Dopants, and Defects (10 sessions). American Physical Society 2011 March Meeting, *Dallas, TX*.
6. Workshop on Quantum Coherent Properties of Spins III, *Orlando, FL*, December 2010. Other members: Enrique del Barco (chairman), Philip Stamp (UBC, Canada), and Stephen Hill (FSU).

5. Sorting Team Leader – Complex Structured Materials. American Physical Society 2010 March Meeting, *Portland, OR*.
4. Workshop on Frontiers in Quantum and Biological Information Processing, *Orlando, FL*, November 2006 (sponsored by the Interdisciplinary Information Science and Technology Laboratory at UCF). Other members of the organizing committee: James Hickman, Michael Leuenberger, Dan Marinescu, and Pawel Wocjan (UCF).
3. School on Mesoscopic Electronics. International Center for Condensed Matter Physics, *Brasília, Brazil*, July 1998. Chairmen: Múcio A. Continentino (UFF, Brazil) and Gilles Montambaux (Université Paris-Sud, France).
2. Latin-American Winter School “Chaos and Quantum Mechanics: Theory and Applications”. *Rio de Janeiro, Brazil*, July 1998. Chairman: Alfredo M. Ozorio de Almeida (CBPF, Brazil).
1. XXI National Meeting of Condensed Matter Physics. *Caxambu, Brazil*, May 1998. Chairman: Sylvio R. A. Canuto (USP).

AWARDS AND HONORS

- Outstanding Referee, Physics Review journals, American Physical Society (February 2022)
- Research Incentive Award, UCF (February 2016, February 2022)
- UCF Scroll and Quill Society (October 2021)
- Teaching Incentive Award, UCF (March 2011)
- Honored Instructor, Class of 2002, Department of Physics, PUC-RJ
- Invited commencement speaker, Class of 2000, Department of Physics, PUC-RJ
- Rio de Janeiro State Young Scientist Award, FAPERJ (March 2000)
- CNPq research fellowship (March 1997 – February 2003)
- CNPq doctorate scholarship (September 1989 – February 1994)
- CAPES doctorate scholarship (March 1989 – August 1989)
- FAPESP graduate scholarship (March 1987 – December 1988)
- FAPESP undergraduate research scholarship (August 1985 – February 1987)

PARTICIPATION IN SCIENTIFIC SOCIETIES

- Member, American Association for the Advancement of Science (since 2016)
- Member, American Association of Physics Teachers (since 2016)
- Member, European Physical Society (since 2012)
- Founding member, Brazilian Society for Materials Research (2001)
- Fellow, American Physical Society (since 2017; member since 1993)
- Member, Brazilian Physical Society (since 1988)

VISITING POSITIONS

- Visiting scientist, Institute of Physics, Fluminense Federal University, Niterói, Brazil (May/June, 2013; May/June, 2014; June/July 2015; November/2019).
- Fellow, International Center for Transdisciplinary Studies, Jacob University, Bremen, Germany (July 09 – 30, 2008).
- Visiting scientist, Max-Planck Institute for the Physics of Complex Systems, Dresden, Germany (June 03 – 30, 2007).
- Visiting scientist, Centre d'Études Nucléaire de Bordeaux-Gradignan, France (May – July 1989).

OTHER POSITIONS

- Co-Founder and Board Secretary, USEncryption, Inc. (Orlando, FL).
