

SEPTEMBER 21-23 2023

UNIVERSITY OF CENTRAL FLORIDA | ORLANDO, FL, USA

# Nanoscale Infrared Spectroscopy Course

An educational forum for current and future users of nanoscale infrared spectroscopy

The NanoScience Technology Center and Physics Department at the University of Central Florida are pleased to collaborate with Bruker to offer a Nanoscale Infrared spectroscopy Course. This free course aims to introduce the basics of the techniques and some recent advances in the field. Hands-on demonstrations related to sample preparation and imaging techniques will be organized during the event. Novice and experts are welcome. We encourage students and postdoctoral fellows to participate.

## Organizers

Prof. Laurene Tetard, NanoScience Technology Center & Physics Department,  
University of Central Florida, USA

Prof. Francesco Simone Ruggeri, Laboratory of Organic Chemistry & Physical Chemistry,  
Wageningen University, Netherlands

Dr. Cassandra Phillips, Product Manager, Nanoscale IR Spectroscopy  
Bruker, USA
