Tips for Safe Driving

- Have person with dementia or Alzheimer’s disease (AD) to drive when making shorter trips (i.e. to grocery store or church)
- Make sure person in driving on familiar roads
- Avoid difficult left turns
- Avoid driving at night
- Avoid driving in traffic
- Avoid driving during bad weather

In general, try to find ways to reduce the amount of driving the person is doing.

If necessary, talk to the doctor in private and request for the doctor to suggest no driving, particularly if medications are being switched.
