EVIDENCE OF SUSTAINED PERFORMANCE ACROSS CAREER

As I detail below, I have a career total of 67 peer-referred journal publications. Note that my publication record reflects a sustained level of high scholarly performance throughout my career. To illustrate this sustained level of performance, I have divided my career into three roughly equal-sized periods: (a) 2004 to 2010, (b) 2011 to 2017, and (c) 2018 to present. I have maintained a uniformly high level of productivity across these three periods:

- 2004 to 2010 (7 years) – 26 peer-reviewed publications = 3.71 publications per year
- 2011 to 2017 (7 years) – 21 peer-reviewed publications = 3.00 publications per year
- 2018 to present (6.08 years) – 20 peer-reviewed publications = 3.28 publications per year

Peer-Refereed Journal Articles (*N* = 67)

*graduate student coauthor; **undergraduate student coauthor

For each article, order of authorship was determined by size of contribution (i.e., first author contributed the most, second author contributed the second most, etc.)

EVIDENCE OF SUSTAINED PERFORMANCE ACROSS CAREER

As I detail below, I have a career total of 125 conference presentations. Note that my record of presenting research at conferences reflects a sustained level of high scholarly performance throughout my career. To illustrate this sustained level of performance, I have divided my career into three roughly equal-sized periods: (a) 2003 to 2010, (b) 2011 to 2017, and (b) 2018 to present. I have maintained a uniformly high level of productivity across these three periods:

- 2003 to 2010 (8 years) – 38 conference presentations = 4.75 conference presentations per year
- 2011 to 2017 (7 years) – 47 conference presentations = 6.71 conference presentations per year
- 2018 to present (6.08 years) – 40 conference presentations = 6.57 conference presentations per year
