Come and join our Wyndham Family and discover the rewards for your career.

Wyndham Vacation Ownership is searching for a **Sr. SAS Data Analytics and Reporting Analyst** in Orlando, FL. The Sr. SAS Analyst will report directly to the Manager of Business Intelligence and provides business and financial support to achieve Marketing and Sales efficiencies. This position will communicate with all levels of leadership to achieve the organization goals. This includes ensuring that these goals are strategically aligned, especially in the areas of creating positive cash flow, inventory optimization, new owner creation, and sales & marketing efficiencies. New strategic initiatives require that an infrastructure be created to provide better data collection, reporting, and the development of analytical tools. The Sr. Business Analyst will actively create a culture of maximizing profitability and service delivery partnering with internal stakeholders. Establish effective working relationships with peers in sales, marketing, operations, IT, accounting and finance departments gleaned best practices to achieve mutual gains. Establish a culture of continuous process improvement by establishing and executing upon standard operating procedures. Develop new strategic initiatives that will require an infrastructure to be created to provide better data collection, reporting, and the development of analytical tools.

- Using SAS modeling software, create, document, and refine statistic-based predictive models for a range of internal customers to identify areas of growth and capitalize on opportunities
- Partner with Sales Operations to evaluate marketing channels and recommend solutions of increased profit and new owner creation by evaluating sales efficiencies and other key performance indicators
- Develop, implement and maintain data models to incorporate statistical forecasting and support inventory and reservation systems for all resorts in WVO

- Manage data systems by working with internal and external clients which will include but not limited to importing and exporting files from a range of sources
- Co-lead SAS knowledge and training to various areas of the organization

Qualification

- Bachelors degree in Finance, Economics, Statistics, Computer Science or relevant area of study
- 5+ years experience in statistical analysis and forecasting required
- Experience with SAS Data Miner / Forecast / Statistical modeling software (4+ years).
- Experience in data manipulation and reporting using Oracle SQL querying tools such as Oracle SQL*Plus, SQL Navigator, Toad, Business Objects Designer and Reporter.
- Experience with large Oracle (10g preferred) relational databases.
- Experience with database software applications and data mining tools (3 years).
- PL/SQL programming for complex stored procedures, SQL*Loader, packages and triggers. (2 years).
- Strong knowledge of SQL*PLUS and SQL Navigator (2 years).
- Expertise with Microsoft Excel and Access
- SAS certifications a plus
- Timeshare, Hotel, or Travel industry experience a plus

Benefits

A career at Wyndham offers you great benefit opportunities with a competitive package of salary and bonus, benefits and recognition. In addition to great employee discounts on such travel related areas as hotel & lodging, car rentals & other goods & services, you will receive:

- Medical/dental and vision care plans
- A 401(k) program that matches dollar for dollar up to 6% of salary (to government max)
- Programs that include Flexible Spending Accounts, short & long term disability, life insurance & educational assistance amongst others

Along the way, you will have an opportunity to contribute to improving the world around us through our volunteer efforts and global sustainability program, Wyndham Green.

Come and be part of One Family, One Team, One Company . . . Wyndham
