# Internship Program at the Federal Reserve Board

**Project/Work Description**

Responsibilities will include text mining, data analysis, and report creation. Quantitative tasks include using SAS Enterprise Guide for query and data mining as well as preparing data for use in dashboards and reports. Specific project work will depend on the skill level of the intern. Knowledge of statistical programming packages, such as SAS, is preferred. Strong analytical skills or background; ability to work with large/complex data sets. A major in Economics, Statistics, or Finance is preferred.

* Desired SAS skills include SAS 9.3, SAS Enterprise Miner, SAS Enterprise Guide, and Tableau.
