

Do you like solving problems? Are you innately curious?

A woman with long dark hair and glasses is shown in profile, looking towards the left. She is positioned in front of a large screen that displays various data visualizations, including bar charts, line graphs, and network diagrams. The screen is filled with blue and green light, creating a high-tech, data-driven atmosphere. The woman's face is partially in shadow, and she appears to be focused on the information on the screen.

DATA SCIENCE INTERNSHIP

Brevard Health Alliance is the only Federally Qualified Health Center in Brevard County. Our mission is simple - to advance community health by providing a medical home where all patients receive high-quality care.

The U.S. healthcare system is overflowing with data and challenges with interoperability. Our team is looking for bright, inquisitive minds to grow with us as we begin our data science journey and lay the foundation. This paid internship will provide insights to advanced statistical analysis, through processing enterprise data. Interns will work across departments like Quality and Operations to achieve healthcare insights and solutions for our community!
